

MARQUETTE UNIVERSITY

2015 - 2016 Undergraduate First Destination Survey

Executive Summary

Office of Institutional Research & Analysis and the Career Services Center

INTRODUCTION

---

---

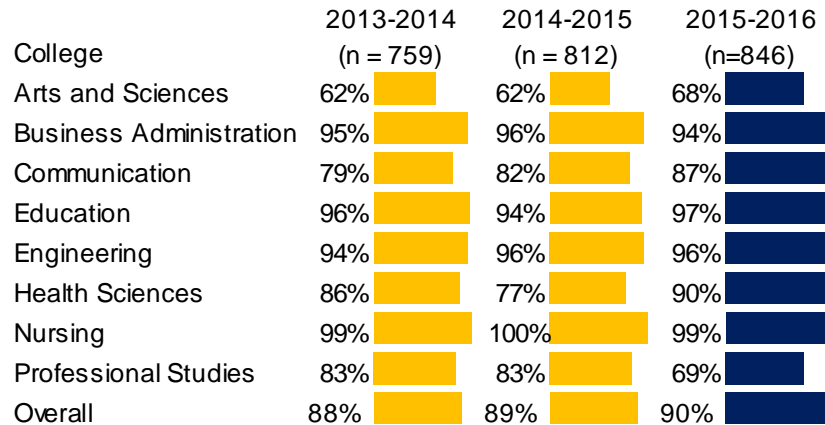

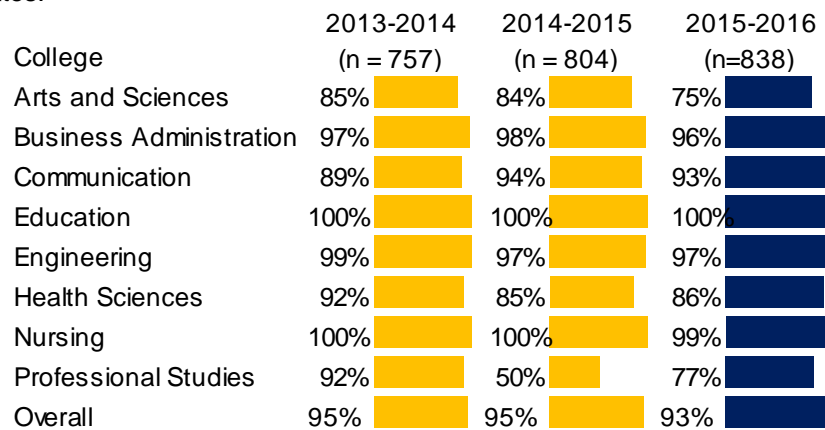

### Full-time Employment

Respondents were asked to indicate the relationship of their position to their major **and/or** their career goals. Respondents in the military or in postgraduation stipend-paid service positions are excluded from this section.

Overall, 90% of students with full-time employment reported that they considered their job **related to their major**, compared with 89% in 2014-2015 and 88% in 2013-2014.

In 2015-2016 93% of students with full-time employment reported that they consider their job **related to their career goals and/or an entry-level path** that will allow them to achieve their career goals. This is a slight decrease from 2014-2015 (95%) and 2013-2014 (95%) graduates.

The table below shows gross starting salaries of full-time, non-temporary employed graduates by college. Respondents in the College of Professional Studies are excluded due to a small number of respondents. The salary numbers exclude those active in the military, those in a post-graduation stipend-paid service position, those in a temporary position, and those employed as Medical Scribes. About 67 percent of full-time employed respondents reported salary information on the survey (compared with 79% in 2014-15 and 80% in 2013-14).
