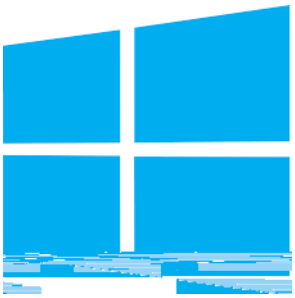
Set up Adobe Dreamweaver for Windows for the Production Web Server



These instructions will help you set up Adobe Dreamweaver for Windows to use the live www.marquette.edu Web server, also known as the production (prod) server.

Before You Start
You must either use a wired network connection (Ethernet) on campus or connect to the encrypted MU Secure wireless network.

If you are accessing from off-campus, you must first access Marquette VPN (see https://www.marquette.edu/vpn/ for details).

To set up Dreamweaver for the first time or for a new website

1)

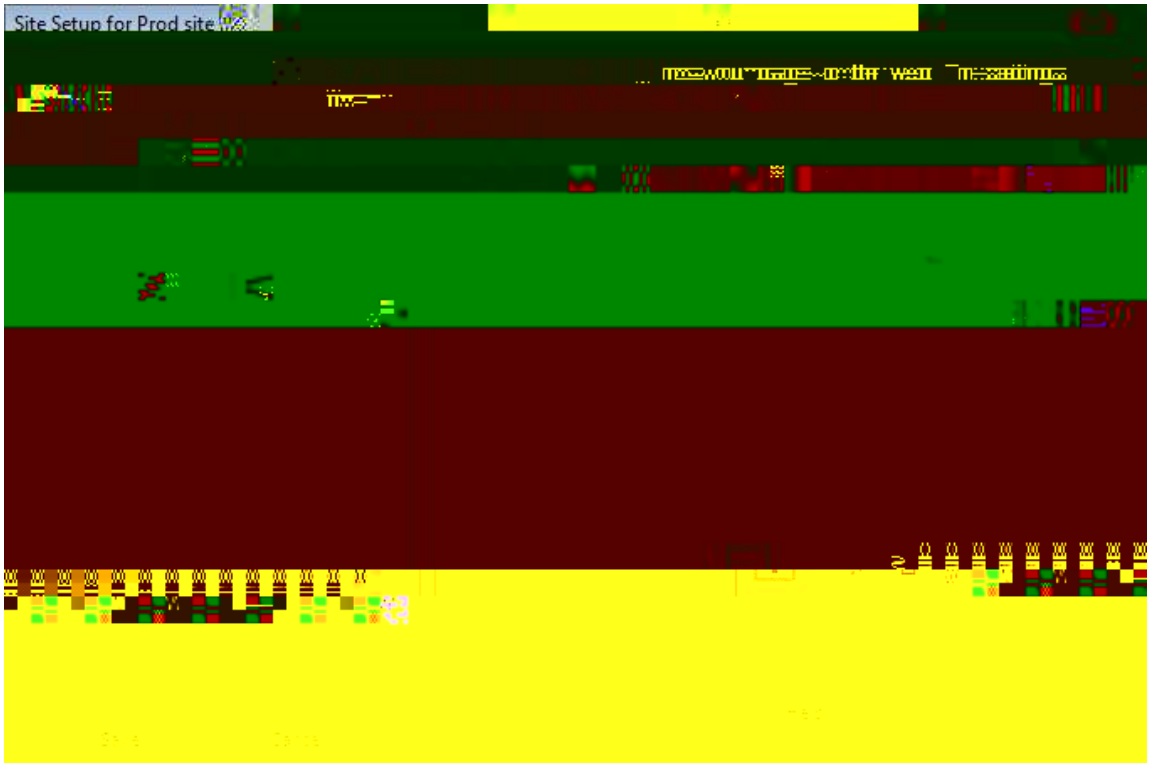
6) The dialog box changes to the screen below.

A) For Server Name, type **Prod *site***
where

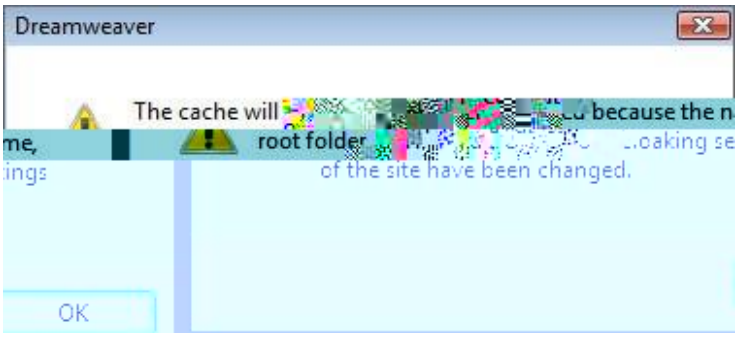
D) For Web URL, enter your web address, following the pattern of https://www.marquette.edu/*site*/ replacing *site* with your actual website.

E) Click Save.

7) Next you will see this screen. Click **Save.**



8) The following dialog box will appear. Click **OK.**



Troubleshooting

,I \RX VHH DQ HUURU VWDWLQJ ³&DQQRW GLVSOD\ WKH U yet able to connect to the Marquette Web server.

3OHDVH YHULI\«

- You have a wired connection to a campus network jack or a MU Secure wireless connection or a Marquette VPN connection.
- You have entered the correct network path. See the appendix at the end of these instructions to look up the network path based on your web address.
- You have added your own Marquette username immediately after *prod-* in the network path.

« W K H Qrefresh.com again. If problems persist, contact the IT Services TechSquad at (414) 288-7799 or https://techsquad.mu.edu/.

11) Dreamweaver connects to the web server and shows you your remote files for editing. You will see the Remote Server view showing files (see screenshot below). You have successfully connected Dreamweaver to the Marquette web server.
